

Attention Late Model Drivers

Car Weight: Due to recent events and dyno testing, we are not yet ready to adjust car weights as had been anticipated. Check the web site next week for further update.

Current weights are:	LM and GS built	3,000 (1,350 right side)
	LM crate	3,000 (1,350 right side)
	GS crate	2,950 (1,325 right side)

Four-tire Nights: In an effort to ensure enough good scuffs are available for our Late Model teams, the events listed below have been designated four-tire nights at which teams may purchase four race tires. All other events will be two-tires, only.

May 23 (150 laps)

June 27 (100 laps)

August 1 (150 laps)

September 5 (150 laps)

September 19 (200 laps)

Attention Street Stock Drivers

Any Street Stock drivers buying tires for an event must select their tires from the stacks in the tire compound on race day. No using tires obtained from Late Model teams in the pits.
